

# GoProtect

## Patio Cleaner

A Cleaner that removes all forms of organic growth and soiling from Patio, Driveway & Hard Landscaping Ground Surfaces

**Before**

**After**

### Product Description

**Patio Cleaner** is a high performance cleaner which removes organic and microbiological soiling from porous building material such as stone, concrete, wooden decking & tarmac. The treated surfaces can simply be rinsed with water without using a pressure washer.

It contains no potassium hydroxide, hydrochloric or phosphoric acid, quaternary ammonium or solvents. It does not alter the colour of the substrate, but always test on a small, discrete patch before using on full area.

It is recommended for the treatment of paths, drives, monuments, decking and patios.

For lasting results, we recommend the use of **GoProtect MULTI-SURFACE PROTECTOR**.

### Packaging

1 Litre and 5 Litre Containers

## Characteristics

- Does not damage the substrate surface, unlike acidic cleaning products.
- Fast acting
- High penetrating power
- Waterborne product.
- Contains no acid
- Brightens most surfaces
- Easy to use

## Technical Information

- Physical state at 20°C: Liquid
- Appearance: Clear
- Odour: Characteristic
- PH: >11
- Boiling Point: 100 °C
- VOC: 0 g/L
- Density: 1.08
- Solubility in water: Fully soluble
- Flash point: N/A

## Coverage

- The figures indicated are approximate and should be used only as a general guideline:  
1 Litre = 3 to 5m<sup>2</sup>.

## Storage

- 24 months from the date of manufacture in original unopened container in a clean, dry and ideally at 10-25°C.
- Keep away from extreme cold, do not store in conditions below 5 °C.

## Cleaning Equipment

- Clean tools and equipment immediately after use with water.

## Application

- Shake the container well before use.
- Use directly from the container, do not dilute or mix with another product.
- Always carry out a test first to ensure the finished result is acceptable and establish the time required to achieve this result.
- Apply in dry weather, on dry or slightly damp material, using a low pressure sprayer (i.e. garden sprayer) until surface is saturated. If there is a lot of fungi or moss, brush off as much as possible before application.
- Leave for 30-90 minutes. Allow for more time in cold weather (less than 10 °C). Can be applied during an evening covered with plastic sheeting and left overnight.
- Rinse with water or high pressure washer.
- For best results, (outside use) allow **PATIO CLEANER** to work for 8 hours and whilst there is no rain fall expected.

### Recommendations

- Do not apply on to metallic or impermeable materials.
- Do not allow to contact plants, shrubs or grass
- Protect any surface or area not being treated.
- Do not apply during rain, frost or when surface and air temp is <5 °C and >30 °C.
- Do not dilute or mix with any other product.
- Never proceed without carrying out a test patch to ensure surface compatibility.

### HEALTH & SAFETY

- Respiratory Protection: Under normal conditions of use where adequate ventilation is available, no special respiratory protection equipment is needed.
- Hand Protection: None required
- Skin Protection: No special protective clothing or skin protection is required under normal conditions of use
- Eye Protection: If there is a real risk of splashing, wear protective goggles
- If swallowed: do not induce vomiting. Contact a doctor or a specialist

### KEEP OUT OF THE REACH OF CHILDREN
